

Christmas Bauble

The bauble is cut from felt using the template provided. You may use different colours or keep to one colour if this is you have a theme colour.

Embellishment need to be placed onto the sides before you start to sew as this will be easier than when full assembled.

The embellishment can be sew or glued in place as these are not toys and will be hanging on the tree the wear and tear should be minimal.

Once you have completed the embellishing sew with a decorative stitch along one edge (as above). This will help support the wadding while the other sides are stitched. Remember to attach the ribbon to the top of the bauble to complete the project.
