

Felt Hearts

Cut 2 felt pieces from template (need to be contrasting colours to create a good effect)

Remember to cut the strips from the folded end.

1. Cut the felt sections from the template and cut the strips that are to be woven.
2. Place the two sections to form the heart shape then bend back the strips of the top section.

3. Start to thread the strips through. Keep checking that you are threading through correctly and the heart will open.

4. Pull into shape ready for sewing

5. Stitch around the top edge to neaten and close top slightly (this will ensure the contents remains inside)

6. Add ribbon and button to complete the decoration.
